Senior Web Developer

Over seven years of front-end development experience.

In-depth experience creating custom web sites leveraging HTML5, CSS3, and JavaScript as a cross-functional and hands-on problem solver. Adept at developing custom themes, comprehensive documentation, and driving on time and under budget project results.

*Coding / Front-end Development / Technical Troubleshooting
Team Collaboration / Mentorship / Automation / Documentation*

TECHNICAL PROFICIENCIES

Development Tools: HTML5, CSS3, Scss, JavaScript, jQuery, ReactJS, VueJS, WCAG, Accessibility, VoiceOver, aXe, Wave, Figma, CSS Animation, User Interface, PHP, User Experience, UI/UX, Sketch, WordPress, Git, Agile, Scrum, Wireframe, Mockup, Prototype, Responsive Design, Mobile First Design, Bootstrap, Foundation, Vim, Atom, Terminal, Webpack, Gulp, Brackets, VS Code, bash, Jira, Adobe XD.

PROFESSIONAL EXPERIENCE

Senior Web Developer (6/2020 – Present) Timmermann Group, Saint Louis, Missouri

Technical Scope: WordPress Themes, Figma Designs, Webpack, Scss, aXe, Wave, VoiceOver.

Drove development of custom code and WordPress themes, coding of a Styleguide for individual clients, and provided maintenance and support for numerous clients. Wrote and maintained technical documentation and coding standards and linting; coded and tested WCAG 2.1 AA guidelines. Maintained client site using WP Blocks in ReactJS. Built a VueJS location finder that integrated with a third-party API and also Google Maps.

Key Achievement:

- Lead--and primarily solo--developer on a large ecommerce project built as a custom WordPress theme with WooCommerce and an API integration during checkout.

Digital Developer (3/2019 – 4/2020) Magnetize, Saint Louis, Missouri

Technical Scope: WordPress Themes, Adobe XD Designs, Gulp, Scss, aXe, Wave, VoiceOver.

Drove development of custom code and WordPress themes, coding of a Styleguide for individual clients, and managed multiple concurrent projects. Wrote and maintained technical documentation and coding standards; coded and tested WCAG 2.1 AA guidelines.

Key Achievement:

Kevin Kendle

Page Two

- Excelled as the sole developer in charge of creating custom WordPress themes under strict deadlines, completing projects on time with no supervisor while ensuring high quality results.

Web UI Developer (3/2018– 3/2019)

New Balance, Saint Louis, Missouri

Technical Scope: Scss, Git, Confluence, HTML, JavaScript, CSS, A/B Testing, Agile methods.

Led coding, documentation, process design, and mentorship of four developers for a retail design system. Developed templates and technical documentation, converted PSD to HTML/CSS/JavaScript for emails/landing pages/banners/sliders. Oversaw A/B testing and email marketing, collaborated with cross-functional teams, and ensured on time and high quality results.

Key Achievement:

- Drove effective documentation of team processes and code standards to improve code consistency.

UI/UX Architect (12/2016 – 3/2018)

USDA, Saint Louis, Missouri

Technical Scope: Sketch, Scss, Gulp, Typescript, Angular Material.

Created innovative UI/UX solutions, including design, coding, and maintaining a design system and development of Angular 5 rapid prototypes. Developed mockups, priorities, and wireframes for stakeholders and documented systems and processes. Designed UI Kit and Patterns Library using Sketch, organized and condensed code, and orchestrated standardized approaches to tasks and projects.

Key Achievement:

- Championed the architecture of consistent design and development standards for a unified coding approach.

Software Engineer (9/2015 – 11/2016)

Multiply (formerly Answers), Saint Louis, Missouri

Technical Scope: CSS/Scss, Gulp, Grunt, Jira, PHP scripts, automation, coding.

Excelled as the CSS/Scss Developer for multiple public facing websites, including working with cross-functional teams to assess business needs and delivering projects in a fast-paced Agile environment. Developed CSS/Scss code using standards and Responsive Design, cross-browser compatible code, flexible code for multiple platforms, and A/B testing. Developed bash and PHP scripts in furtherance of automation and comprehensive documentation.

Key Achievement:

- Drove significant improvements to site creation/backend processes through consolidation of common development policies.

Web Developer (12/2013 – 10/2015)

Schnucks, Saint Louis, Missouri

Technical Scope: Bootstrap, jQuery, SVN, Git, Wireframe and UI design, Photoshop, Sketch, AngularJS.

...Continued...

Drove the design and development of user interfaces, user experience, animations, code, and tools for an Online Ordering project with functionality across mobile, tablet, and desktop users. Leveraged Bootstrap and jQuery for grid and UI components, performed Mobile First Design, and leveraged SVN/Git for source control. Ensured compatibility with best practices, developed user stories, and coded Photoshop and Sketch files to HTML.

EDUCATION AND TRAINING

Bachelor of Fine Arts (BFA)

American Intercontinental University, Online
